Professional Summary:

Frontend Engineer with a background in creative development, now building web and mobile applications using **React, TypeScript, and modern JavaScript libraries & frameworks**. Experienced in working on real-time systems, enterprise platforms, and integrating APIs, with a focus on simplicity and usability.

Skills:

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/SASS

Frontend: React, React Native, Next.js, Vue.js, AngularJS, Ember.js

State & Data: Redux, Redux Toolkit, TanStack Query (React Query), Pinia, NgRx

Testing: Jest, React Testing Library, Cypress

UI & Styling: Tailwind CSS, Ant Design, Material UI, styled-components, Bootstrap

Backend & APIs: Node.js, NestJS, REST APIs, WebSockets

Tooling: Git, Vite, Expo, Postman, Figma, Vercel, Webflow, OneSignal, Supabase

Experiences:

Senior Frontend Engineer

@ CCTalent (DEC 2023 - PRESENT • CLARK / REMOTE)

- **Sports & Fan Engagement Company – 8 products across mobile and web**

Shipped three cross-platform React Native apps (fan engagement, sports analytics, live news) with social and guest authentication, real-time data visualizations for live scores and match schedules, and push notification systems driving timely engagement. Engineered a reusable real-time embeddable content feed over WebSockets for instant third-party updates. Built and maintained high-traffic web properties including a sports news portal and analytics platform, both shipped in multiple localized versions.

React Native • Expo • TypeScript • Vue.js • Pinia • WebSockets • OneSignal • Laravel

Senior Software Engineer

@ Cognizant Softvision (NOV 2021 - DEC 2023 • MAKATI / REMOTE)

- **Enterprise Logistics & Transportation**

Built frontend features for a multimodal transportation management system during a post-acquisition platform consolidation. Delivered shipment tracking, analytics dashboards, and workflow automation. Co-authored a reusable component library for tables, filters, and forms adopted across multiple TMS frontends, and optimized data-heavy views for performance and maintainability. Worked from a shared priority queue across modules, ramping into unfamiliar areas while maintaining sprint delivery.

AngularJS · TypeScript · NgRx · SCSS · Bootstrap

Frontend Engineer

@ Independent Contractor (OCT 2020 - NOV 2021 • REMOTE)

- **AI-powered advertising platform – 3 products**

Built the MVP of the Ad Library, a searchable database of ad creatives with filtering by format and industry, saved boards, and reuse as input for ad generation – laying the foundation for the shipped product. Developed the frontend for AI Copywriter, supporting prompt-based generation with tone selection; the workflows built here went on to power the launch of AI-Ads. Led frontend development on Sparkle, an internal ticketing and creative request system, building ticket creation, status tracking, and client-designer collaboration flows.

React · TypeScript · Redux · Material UI · SCSS

- **Shipping & Order Management Platform**

Contributed to shipment creation, tracking, and order management features on a desktop-first shipping and order management platform. Focused on a smooth user experience and clean, scalable frontend code.

React · Redux · Typescript · SCSS

Earlier Experience – Web, Creative, Advertising & Email Template Developer

@ Independent Contractor • MRM MCCANN • Joystick Interactive • Sizmek • Cognizant • Wideout Workforces (2010 - 2020)

- Developed **browser-based applications** and interactive front-ends with **JavaScript** and **modern libraries & frameworks**.
- Built **interactive rich media ads and digital campaigns** using HTML5, CSS3, JavaScript, and animation tools
- Optimized **high-performance ad creatives** across multiple platforms, focusing on engagement and responsiveness
- Created **reusable templates and scalable ad formats** for marketing campaigns

Additional engagements: Creator link & monetization platform (React, TanStack, Tailwind), Web3 digital asset minting platform including NestJS backend APIs (Vue, Pinia, NestJS) Full detail at hernanosaurus.dev.

Personal Projects:

- [keyboardforhire.dev](#)

Solo-built an invite-only community for developers: profiles, discussions, a jobs board, and anonymous salary, interview, and company reviews. Designed an anonymity model that lets people share honest experiences without revealing their identity.

Next.js · TypeScript · Supabase · Tailwind CSS · Vercel

- [hernanosaurus.dev](#)

Designed and built a performance-focused portfolio site with animated section transitions and a curated project archive.

Next.js · TypeScript · Tailwind CSS · Framer Motion · Vercel

Education:

Bachelor of Science in Information Technology, 2010,
Polytechnic University of the Philippines – Mabini Campus.
